ABSA Certificate Course

Understanding, Analysing & Applying Risk in a Boarding School

In conjunction with CompliSpace, we are offering a four week Certificate Course which certifies staff to understand, analyse and apply risk management techniques within their roles in a boarding environment.

Risk is a boarding school topic that either generates angst or engages supervisors in meaningful discussions about how to better care for their boarders. Even though it can be argued that risks are similar in all boarding schools, jurisdictional legislative and regulatory requirements for boarding schools can affect the level of risk for each school.

In these sessions, Craig D'cruz will provide a broad overview of how to identify and manage risks in a boarding school environment. For example, he will argue that the greatest boarding risk is the risk that a school has failed to adequately train and inculcate its boarding supervisors in its child safe culture. This course is suitable for all Boarding Executive Staff and Supervisory Staff.
